

Internal Combustion Engine Counterbalance Truck

H35 – H50

Capacity 3.5 - 5.0 t | Series 1204

Robust all-rounder

- Hydrostatic drive, double pedal control and Linde Load Control for efficient load handling
- Robust design and maintenance-free components guarantee high vehicle availability and low operating costs
- Asymmetric slim mast profiles, narrow A-pillar, lowered front plate and large roof panel for excellent visibility
- Wireless data transmission for smooth integration in software systems, e.g. for fleet management
- The vehicle's low center of gravity and intelligent assistance systems reduce the risk of tipping and accidents

CHARACTERISTICS

All-round visibility

Safety

- Optimized design provides excellent visibility in all directions
- Roof with narrow crossbars and optional bulletproof glass simplifies work at high lift heights
- Low load center of the vehicle and a high mounted steering axle improve stability in curves
- Linde Curve Assist and Linde Load Assist reduce the risk of tipping and accidents during loading

Driver workplace

Ergonomics

- Ergonomic and intuitive operating concept maximizes forklift operator comfort
- Components decoupled from chassis (axles, mast and tilt cylinder) protect against shock and vibration
- Wide range of ergonomic seats prevent posture problems
- 3.5-inch display shows steering and tilt angles as standard and provides an overview of all important information at all times

Linde Load Control

Handling

- Linde Load Control and dual pedal control guarantee precise control of all travel and mast movements
- Top-mounted tilt cylinders guarantee torsional rigidity and high residual capacity at high lift heights
- Minimized fuel consumption reduces operating costs
- Freely programmable buttons in the armrest ensure access to frequently used functions

Easy service access

Service

- Robust design with low-wear and maintenance-free components ensures high vehicle availability
- Linde Engine Protection System (LEPS) provides additional protection against engine damage
- Extra-large service openings facilitate maintenance
- Standardized bolted connections save considerable time during maintenance and repairs
