

Standard and Optional Equipment

Standard Equipment

- The operator / truck interface
 - Long tiller arm with low mounting point made out of Grivory®
 - Exxtral® motor and battery cover
 - Soft fold back
 - End-of-stroke resistance
- Multifunction display with hourmeter, maintenance indication, battery discharge indicator and internal fault code indication
- AC motor
- Linde LAC controller
- CAN-Bus architecture
- Electromagnetic brake
- Automatic parking brake
- Cushion rubber drive wheel
- Tandem polyurethane load wheels
- Fork length: 1150 mm
- Width over forks: 560 mm
- Cold store protection to -10°C
- Vertical 2PzS battery change
- Horn
- Proportional speed control (T20)
- Creep speed control (T20)

Optional Equipment

- Drive wheels: polyurethane, non marking polyurethane
- Creep speed control (T16)
- Proportional speed control (T16)
- Side 2PzS battery change
- Alternative fork lengths and widths
- Fleet management LFMaccess and LFMbasic
- Cold store protection to -35°C
- Automatic battery watering system

Electric Pallet Truck T16, T20 1600, 2000kg

1151

Linde Material Handling

Linde

Safety

The lower chassis is rounded in shape and low to the ground protecting the operator's feet whilst the hand guards of the tiller head effectively shield his hands. The long tiller mounted low down on the chassis ensures ample safety clearance between operator and truck as well as keeping steering effort low.

Performance

The combination of a new AC motor and Linde LAC digital control makes these pallet trucks highly efficient. Operating parameters can be adjusted to match any application. When additional performance is needed, a booster effect automatically provides higher torque.

Comfort

All controls on the ergonomic tiller can be easily operated by either hand. An innovative creep speed button offers utmost manoeuvrability in confined areas. Proportional speed feature automatically alters traction speed in relation to the distance between truck and operator. Finished in tactile materials, these trucks deliver effortless, smooth load handling to deliver greater productivity.

Reliability

Despite their visual appeal, these pallet trucks are rugged and durable. Light, warm and robust at the same time the tiller out of Grivory® material ensures a highly resistant trucks interface. Exxtral®, launched for the motor cover gives no compromise regarding softness and sturdiness protecting the technical compartment. In addition, the fork tips which each withstands 2,000kg contribute to a long, trouble-free life.

Service

It is not just about the truck in operation: a maintenance-free AC motor maximises uptime reducing operating costs. All truck data is immediately and easy accessible to the service engineer via the CAN-Bus architecture. Fast, easy access to all internal components ensures service tasks are completed with a minimum of delay.

Features

Steering system

- Proportional speed control varies truck speed automatically in relation to tiller angle for safe, comfortable and productive operation
- A Creep speed button ensures high manoeuvrability in confined areas when operating at low speeds with the tiller in the upright position
- End-of-stroke resistance on the tiller avoids accidental, abrupt braking
- Soft tiller fold-back slows down the tiller when returning into upright position, avoiding tiller snapping on the motor cover

Working station & Display

- Wide, deep storage compartment for shrink wrap, pens, markers etc.
- Strong plastic Exxtral® motor and battery cover last the lifetime of the truck
- Multifunctional display as standard with hourmeter, maintenance indication, battery discharge indicator, fault code indication

Tiller & Tiller head

- The ergonomic Grivory® material ensures effortless operation
- Long tiller with low mounting point provides a large safety clearance between operator and chassis
- Wrap-around hand protection
- Comfortable controls, operable with either hand and gloves

Braking system

- Highly efficient electromagnetic brake applied by moving the tiller to fully up or down position
- Automatic braking on releasing traction butterfly or reversing direction
- Truck slows before coming to a stop, remaining under total control at all times

Maintenance and CAN-Bus architecture

- Zero maintenance, moisture and dust-proof AC motor
- CAN-Bus architecture enables fast, easy access to all truck data
- Individually adjustable parameters via diagnostic plug
- Rapid and convenient access to main components via front service panel

Subject to modification in the interests of progress, illustration and technical details not binding for actual constructions and may show the optional equipments.
